## Energy & Feedstocks Insight

Timely insights on the energy and feedstocks markets, including renewables, and energy transition

A Corporate License (1-10 users) provides a balanced perspective on forces impacting the energy and feedstocks markets - such as industry efforts to reduce its carbon footprint and achieve net zero emissions - to support your strategic planning, buying and selling decisions.

### Designed for professionals in:

- Supply chain, feedstocks purchasing and procurement
- Strategy and planning
- Environmental, health & safety (EHS) and sustainability

### Key Features

- Expert perspectives on global and regional trends in supply, demand, and capital investment
- Sustainability initiatives, including renewables within the feedstocks mix and emerging role of bio-based chemicals
- Deep-dive analysis of the value chain tracking the energy umbilical cord from midstream supply sources & infrastructure to key petrochemical products
- Industry efforts to reduce its carbon footprint through renewable energy sources and feedstocks such as hydrogen

### Data

- Downloadable data: 5-year record of M&A, Projects, and Annual Results
- Curated data: A 30-day snapshot of Price trends, M&A, Projects & Macroeconomics

### Key Benefits

- Adjust strategy and enable better informed decision-making
- Identify new investment opportunities & emerging trends across different bulk commodity chemical markets
- Get unique perspectives, and news analysis provided by Chemical Week experts

Corporate license for up to 10 users: \$9,995 annually.
