

# The Snapshot

December, Q4, H2 and Full Year 2024

# Embracing the future together.

**Paul Wilson**

**Managing Director**

ETF and Securities Finance  
Products

As we step into the New Year, it is a great pleasure to reach out to you and reflect on the remarkable journey we have shared over the past year in the securities finance markets. **Together**, we have **achieved significant milestones**, and I want to take this opportunity to express my **heartfelt gratitude** for your continued **trust and partnership**. Your support has been pivotal in **driving success**, and I am excited about what we can accomplish together in the coming year.

2024 has been **another successful year** for our clients, marked by **resilience and adaptability** in an ever-evolving market landscape. The securities finance sector has faced its share of challenges, yet your **strategic insights and commitment to excellence** have turned these challenges into opportunities. As we move forward, we remain dedicated to ensuring that you have the tools and resources necessary to thrive in this dynamic environment.

Our **commitment to product development** continues to be a cornerstone of our strategy. We recognize that the right tools can make all the difference in decision-making processes. This year, we have **intensified our focus on enhancing our data capabilities**. By providing you with more comprehensive and **actionable insights**, we aim to **empower your decision-making** and help you navigate the complexities of the market with confidence.

One of the key areas of innovation has been our **Repo Data Analytics (RDA)** product. We have made **significant enhancements** to ensure that you have access to the most relevant and **timely information**. The repo market is crucial for **liquidity and financing**, and we understand the importance of having **accurate data** at your fingertips. Our ongoing investments in this area are designed to equip you with the **insights needed to optimize your strategies and maximize your opportunities**.

In addition to our repo data product, we have also made **substantial improvements** to our **counterparty onboarding portal**. **Streamlining** this process is essential for enhancing efficiency and reducing administrative burdens. Our enhancements are aimed at **simplifying the onboarding experience**, allowing you to focus on what truly matters—**growing your business and achieving your goals**.

Furthermore, we are proud to announce the enhancements made to our **ETF collateral lists**. As the ETF market continues to grow, having access to **robust and reliable** collateral information is more important than ever. Our updates to these lists are designed to provide you with the clarity and **transparency needed** to make **informed decisions**, ensuring that you can navigate this segment of the market with confidence.

As we look to 2025, we are **excited about the possibilities** that lie ahead. We recognize that the landscape of securities finance is constantly changing, and we are **committed** to staying ahead of the curve. Our focus on **innovation, product development, and data enhancement** will remain strong, as we strive to provide you with **the best possible solutions** to meet your evolving needs.

In closing, I would like to share a quote that resonates with the spirit of the New Year. As the poet Robert Frost once said, "In three words I can sum up everything I've learned about life: it goes on." This sentiment beautifully captures the essence of the New Year—a time of reflection, renewal, and hope for what is to come.

**May this New Year bring you joy, prosperity, and continued success.** Together, let's embrace the opportunities that await us and make 2025 a year filled with achievements and growth.

Wishing you a Happy New Year!

Warm regards,

Paul Wilson

# 2024 ends on a high as December revenues +5% YoY

- Monthly revenues reach **\$976M**
- Americas revenues decline 9% YoY
- ETP average fees increase 30% YoY as revenues soar
- Full year 2024 revenues of **\$11.74B**

### US exceptionalism, political uncertainty and economic resilience mark the end of an extraordinary year.

As December unfolded, global equity markets exhibited a mix of resilience and volatility amid ongoing political uncertainties and geopolitical risks. The year 2024 had been characterized by a strong recovery in equities following the resolution of the U.S. election, which led to a rally driven by optimism surrounding deregulation and pro-growth policies. However, as the year drew to a close, various regional dynamics began to shape market performance.

In the United States, the equity market continued to thrive, with the S&P 500 and Nasdaq Composite reaching record highs. The tech sector remained a significant driver of gains, buoyed by strong earnings reports and enthusiasm surrounding artificial intelligence advancements. Consumer discretionary stocks also performed well, reflecting robust consumer spending. Government bond yields fluctuated, with the 10-year Treasury yield remaining above 4.5%, as investors weighed the potential implications of President-elect Donald Trump's proposed policies on interest rates and inflation. Political uncertainty loomed, as investors reacted to the implications of Trump's policies, raising concerns about potential trade tensions and regulatory changes.

European markets faced increased volatility due to political instability, particularly in France and Germany. The collapse

of Prime Minister Michel Barnier's government following a no-confidence vote introduced uncertainty into the fiscal landscape, adversely impacting investor sentiment. The eurozone's economic outlook remained clouded as markets grappled with the implications of potential policy shifts and the rise of populist movements. In terms of interest rates, the European Central Bank signaled its commitment to easing, which contributed to a decline in government bond yields across the region. Despite these challenges, some sectors, such as consumer staples and utilities, showed resilience as investors sought defensive positions amidst the turmoil.

In the Asia-Pacific region, equity markets experienced mixed results. Japan's Nikkei index saw modest gains, supported by a stable economic recovery, while the Bank of Japan maintained its accommodative stance, keeping interest rates at 0.25%. This environment contributed to lower government bond yields, fostering investor confidence in equities. However, South Korean markets faced pressure due to political turmoil surrounding President Yoon Suk Yeol's administration, raising concerns about market stability. In China, the stock market struggled amid ongoing geopolitical tensions and concerns over economic growth, with GDP growth forecasts being adjusted downward. Hong Kong's Hang Seng index also faced headwinds, reflecting investor caution amid regulatory crackdowns and market volatility. The Chinese government pledged to boost domestic consumption, but

uncertainty surrounding the effectiveness of these measures lingered.

Emerging markets faced significant headwinds in December, particularly in Latin America and parts of Asia. Political uncertainty in Brazil and Argentina, coupled with currency volatility, weighed on investor confidence. Government bond yields in these regions rose as central banks navigated inflationary pressures. In contrast, some Southeast Asian markets, such as Indonesia and Vietnam, showed resilience, driven by strong domestic consumption and favorable economic fundamentals. However, overall, emerging market equities lagged behind their developed counterparts, reflecting heightened geopolitical risks and concerns over inflationary pressures.

Throughout 2024, global equity markets experienced a remarkable rebound, fueled by optimism following the U.S. election and a recovery in corporate earnings. However, as December unfolded, political uncertainties and geopolitical risks began to manifest, leading to a more cautious investment landscape. Investors navigated a complex environment characterized by regional disparities, with North America maintaining strength while Europe and emerging markets faced significant challenges. The interplay of political dynamics, interest rate movements, and economic fundamentals will continue to shape the investment landscape as we move into 2025.

In December, the securities lending markets generated monthly revenues of **\$976M**, reflecting a 5% year-over-year increase. This growth occurred despite a 4% decline in average fees across all securities, as on-loan balances rose to \$2.79 trillion. Notably, Q4 recorded the highest average balances of the year at \$2.74 trillion, driven by a continued upward trend in equity market valuations.

All equity revenues increased by 3% year-over-year to \$690 million. This growth was primarily fueled by a 9% rise in revenues from Asia, amounting to \$183 million, and a 14% increase in EMEA revenues, which totaled \$66 million. Although EMEA equity revenues rebounded after a challenging start to the year, they experienced a 27% decline in full-year revenues compared to 2023.

Despite finishing Q4 flat compared to Q4 2023, revenues from Americas equity markets ended the year 14% lower, totaling \$4.3 billion versus \$5.1 billion in the previous year. December revenues were 9% lower than those recorded in December 2023, with average fees declining both month-over-month and year-over-year. December marked a low for average fees in 2024 for Americas equities, which fell to 56 basis points.

In Asia, equity revenue performance remained robust, with an 9% year-over-year increase. Annual revenues in the region experienced only a modest decline of 2% compared to 2023, which is commendable given the challenges faced. Taiwan stood out as a key performer in 2024, with monthly revenues surging 30% year-over-year to \$66 million, accompanied by average fees of 280 basis points. Additionally, Hong Kong saw a remarkable 47% year-over-

year growth in lending revenues during December, with balances increasing by 25% and average fees rising 17% to 184 basis points—the highest monthly fee recorded in 2024.

Exchange-traded products demonstrated strong performance as investors increasingly utilized these assets in their thematic strategies. Monthly revenues surged by an impressive 57% year-over-year to \$76 million during December, achieving the highest monthly revenues of 2024. This positive trend was consistent throughout Q4 and the entire year, with year-over-year revenues growing by 35% and 7%, respectively.

Fixed income assets concluded the year on a robust note, with December government bond revenues rising 12% year-over-year to \$193 million during the month, and corporate bond revenues increasing by 6% to \$86 million. Government bond revenues exhibited notable growth in the second half of the year, particularly in Q4, which saw a 23% year-over-year increase (compared to 15% in Q3, -4% in Q2, and -3% in Q1). Corporate bonds also excelled in Q4, with revenues increasing by 7%, marking the only positive year-over-year growth for any quarter in 2024. Despite average fees remaining steady at 31 basis points throughout the year, average balances grew by 17% year-over-year, with a 23% increase in Q4 alone.

### U.S. stocks surge post-Trump election, while Europe and Asia faced political and economic turmoil.

In Q4 2024, global financial markets experienced both resilience and volatility amid significant political changes and interest rate moves. In October, the U.S. Federal Reserve, led by Chair Jerome Powell, indicated a gradual approach to interest rate cuts, aligning with strong economic indicators. The S&P 500 and Dow Jones reached record highs, driven by robust job growth and consumer spending, despite rising Treasury yields and raising inflation concerns.

Canada's economy demonstrated resilience, prompting the Bank of Canada to cut its benchmark interest rate by 50 basis points to 3.75%. Meanwhile, the European Central Bank (ECB) cut rates for the third time in 2024 to support the economy amid falling inflation. Political instability in France and Germany complicated the economic landscape, while the UK faced turmoil in the gilt market due to aggressive government borrowing strategies.

November saw a pronounced market shift following Donald Trump's presidential victory, with U.S. stock markets surging on expectations of pro-business policies. Treasury yields rose sharply, reflecting inflationary pressures from anticipated fiscal policies. In the cryptocurrency space, Bitcoin rallied, surpassing \$108,000.

In December, U.S. equity markets continued to thrive, with the S&P 500 and Nasdaq hitting record highs. However, political uncertainties loomed, particularly in Europe, where the ECB signaled ongoing easing. Asian markets faced mixed results, with China's recovery remaining fragile amid geopolitical tensions. Overall, 2024 was marked by a significant rebound in equities, tempered by political and economic complexities as the year concluded.

In the securities lending markets, revenues exhibited strong year-over-year performance, with all asset classes showing positive growth except for American Depositary Receipts

(ADRs). The quarter benefited from rising equity market valuations and an escalating interest in fixed income assets. Favorable market conditions for corporate bonds resulted in heightened demand, with balances increasing by 23% year-over-year. Additionally, the growing uncertainty surrounding future path of interest rates in the US spurred significant demand for US Treasuries.

As illustrated by the accompanying graph, Q4 revenues were notably robust when compared to previous fourth quarter periods, reflecting a 9% year-over-year increase. This quarter provided investors with numerous opportunities to engage in securities lending, particularly as interest rate expectations were recalibrated and attention shifted from the current US administration to the incoming President-elect. Exchange-traded funds (ETFs) and fixed income assets emerged as the standout asset classes for the quarter, driven by increased positioning around market events. These asset classes are expected to maintain their momentum as we move into 2025.

## US stocks cap best two years in a quarter century.

The North American equities market experienced a significant rally, following on from the U.S. election and due to the anticipation of further Federal Reserve rate cuts. By early December, investors grew increasingly confident that the Fed would deliver a rate cut in December, with probabilities rising to over 70%. The S&P 500 set another new record, after posting a 5.7% increase in November, marking its best monthly performance of 2024. This surge was largely attributed to strong economic indicators, including robust GDP growth and resilient consumer spending, which buoyed sectors like consumer discretionary and financials. The S&P 500 rose by 23% during 2024, achieving 57 record closes as the economy remained robust, inflation decreased, and a rally in big tech stocks, driven by AI advancements, continued to gain momentum.

In Canada, the equity market also showed positive momentum, with the S&P/TSX Composite Index benefiting from similar economic trends. Canadian equities were supported by strong performances in the energy and materials sectors, which thrived amid rising commodity prices. The Bank of Canada had adopted a more dovish stance, signaling potential rate cuts in response to a slowing economy and rising unemployment. This provided further encouragement to investors, who anticipated that lower borrowing costs would stimulate economic activity.

Additionally, the tech sector in both countries continued to drive gains, with the Nasdaq Composite reaching record highs. However, caution remained as

key economic data, including inflation rates and the jobs report, are likely to influence Fed decisions moving forward. The market's reaction to these data points remains critical, especially as core inflation remained above the Fed's target during the month. Overall, the outlook for North American equities appeared optimistic, but investors were advised to remain vigilant as political and economic uncertainties loomed, particularly with the incoming Trump administration's potential policies on tariffs and deregulation, which could impact both U.S. and Canadian markets.

In the securities lending markets, revenues across Americas equities declined by 9% YoY to **\$326M**. The YoY and MoM decline in revenues was a direct result of a significant reduction in average fees which fell from 65bps during November to 56bps during December. Lendable hit a 2024 high during the month at \$24T, a 29% YoY increase, as did on loan balances at \$673.3B (+2% YoY and +9% MoM).

US equities generated \$287.7M during December, the second lowest monthly revenue figure of 2024 (October \$283.8M). This was a result of a 15% YoY and 14% MoM decline in average fees. Balances remained robust as did utilization as it climbed back above 2% for the first time since October.

Canadian equities experienced a similar fate during the month after demonstrating a 12% YoY and 4% MoM decline. Average fees also fell when compared to November, reaching their lowest level since March (67bps vs 69bps December).

Whilst Brazil finished 2024 on a high, with YoY revenues increasing 146%, Mexican revenues declined 36% after average fees fell for the twelfth consecutive month.

# APAC Equities

## Domestic challenges weigh on investor sentiment.

In December, the Asia-Pacific equities market faced a challenging environment, marked by significant volatility and investor caution. Concerns over potential tariff hikes under President-elect Donald Trump continued to weigh heavily on investor sentiment, leading to notable foreign outflows. In total, investors withdrew approximately \$15.88 billion from Asian stocks, with Taiwan and South Korea particularly affected by these trends.

In South Korea, the market experienced fluctuations following President Yoon Suk Yeol's brief declaration of martial law, which sparked political turmoil and raised fears about market stability. Although the martial law was quickly reversed, the Kospi index still faced pressure as political uncertainty persisted, leading to a decline in investor confidence.

Meanwhile, in Japan, the Bank of Japan maintained its accommodative monetary policy, keeping interest rates steady amid concerns about sluggish economic growth and inflation. This cautious approach contributed to a mixed performance in Japanese equities, as investors awaited clearer signals on future monetary policy.

Despite these challenges, there were signs of resilience in the region, particularly from China's commitment to implement stimulus measures aimed at bolstering economic growth. The People's Bank of China was expected to introduce significant interest rate cuts in 2025, which could create a more favorable environment

for equities moving forward. Overall, December proved to be a month of uncertainty for the Asia-Pacific region, with geopolitical tensions and domestic economic challenges influencing market dynamics.

In the securities lending markets APAC revenues performed well during December, generating **\$183M**, an increase of 9% YoY and 6% MoM. Average fees of 104bps, also a 9% YoY increase, helped to support revenues as balances increased by a more modest 4% MoM. As the month progressed, the volume weighted average fee increased across the asset class, reaching 107bps on December 31st.

Taiwan remained the talk of the town as revenues increased by 30% YoY. Other markets such as Malaysia (+119% YoY), Singapore (+69% YoY) and Hong Kong (+47% YoY) also experienced strong gains as average fees climbed YoY. Singapore experienced the largest increase in average fees of 21% YoY, as on loan balances hit a 2024 high. Balances also increased in Malaysia to their highest levels on record as average fees hit their highest level (473bps) since March (504bps). 2024 revenues grew 73% across Malaysia and the market continued to gain interest from the securities lending community.

Despite revenues declining by 11% YoY and 26% MoM, Australian equities closed out their highest generating quarter of the year. A steady increase in average fees throughout 2024 helped the market to recover from some strong monthly YoY declines in revenue, closing 2024 only 5% lower YoY.

# EMEA Equities

## Political and economic uncertainty raises escalating concerns throughout Europe.

In December, European equities navigated a tumultuous political landscape, particularly following the recent collapse of Prime Minister Michel Barnier's government in France amid a no-confidence vote. This political instability heightened investor concerns, leading to increased risk premiums on French bonds and volatility in the stock market. The euro also faced pressure as uncertainty loomed over the region's economic outlook, with investors closely monitoring developments in France and Germany.

The European Central Bank (ECB) was expected to cut interest rates more aggressively than previously anticipated to support the faltering economy, with only a quarter-point reduction taking place at the December meeting. This dovish stance came in response to weakening economic indicators and rising inflation concerns, which have prompted calls for more accommodative monetary policy. The ECB's actions were viewed as crucial to stabilizing the market and restoring investor confidence amid ongoing political turmoil.

Despite these challenges, some investors saw potential for recovery in European markets, especially as valuations appeared attractive relative to U.S. counterparts. The ongoing consolidation in the banking sector, particularly in Italy, provided opportunities for growth, as mergers and

acquisitions aimed to strengthen the financial landscape. Additionally, European automakers began to rebound, driven by low valuations and the expectation that recent Chinese stimulus measures may also benefit the sector.

However, the overall sentiment remained cautious as the political situation continued to evolve. The rise of populist movements and potential shifts in fiscal policy added another layer of uncertainty. Investors were particularly wary of how the incoming U.S. administration's trade policies might impact European economies, especially regarding tariffs and regulatory changes. As the year drew to a close, European equities faced a complex mix of challenges and opportunities, leaving market participants to navigate a landscape filled with both risk and potential for recovery.

EMEA equities marked a 14% YoY increase during December after generating **\$66M**, the asset classes largest monthly revenue figure since July (\$72.7M). Whilst average fees increased slightly when compared with November (48bps vs 49bps) balances declined as did utilization.

A number of markets saw strong YoY increases in revenues during the month with Belgium leading the pack with a 411% YoY increase. Revenues jumped from \$1.2M during November to an impressive \$5.5M during December. Average fees also shot up to an impressive 241bps. Revenues also significantly increased YoY across France (+99%), Poland (+95%) and Spain (+51%) whilst falling 20% across Germany.

# Exchange Traded Products

## Monthly inflows top \$1 trillion for the first time in 2024.

The exchange-traded funds (ETFs) market experienced remarkable growth in December, with inflows exceeding \$1 trillion for the first time in 2024. This surge was largely driven by bullish sentiment in North American equities, as investors sought to capitalize on the strong performance of the stock market following the U.S. elections. The optimism surrounding the prospect of lower interest rates and a favorable regulatory environment under the incoming Trump administration further fueled this growth.

Crypto ETFs, in particular, emerged as standout performers during the month. The iShares Bitcoin Trust and iShares Ethereum Trust saw significant gains of 39% and 42%, respectively, in November, driven by excitement about a more crypto-friendly regulatory landscape. This enthusiasm extended into December, as investors increasingly turned their attention to blockchain-related innovations and digital assets, benefiting ETFs focused on these sectors. Funds such as the Valkyrie Bitcoin Miners ETF and the VanEck Digital Transformation ETF also demonstrated strong performance, reflecting the growing interest in the cryptocurrency and blockchain space.

Traditional equity sector ETFs, especially those in consumer discretionary and financials, continued to see robust performance. The Consumer

Discretionary Select Sector SPDR and the Financial Select Sector SPDR capitalized on strong economic indicators and seasonal trends, with consumer spending remaining resilient during the holiday season. The positive momentum in these sectors contributed to the overall strength of the ETF market.

During 2024 the ETF landscape continued to diversify, with new products focusing on private credit and alternative investments gaining traction. The introduction of innovative ETFs has allowed investors to access a broader range of asset classes and investment strategies. As investor interest remains high, the outlook for ETFs in 2025 appears promising for the asset class.

ETP securities lending revenues topped **\$76M** during December, marking their highest revenue generating month of 2024. Despite a MoM decrease in average fees (78bps December vs 83bps during November), balances hit their highest level of 2024 at \$112.8B, a 20% increase YoY and a 3% increase MoM.

Americas ETFs saw their second highest monthly revenues of the year during the month after generating \$65.4M. Utilization remained above 12% and lendable increased to \$462B. Both European and Asian ETFs also experienced strong YoY returns with Asian ETFs seeing their highest monthly revenues and average fees. Balances also hit a 2024 high as did utilization, surpassing 16%.

# Corporate Bonds

## Re-financing takes hold as interest rates fall.

In December, corporate bonds witnessed a notable uptick in refinancing activity as companies sought to manage their debt amidst shifting economic conditions. Nearly 80% of high-yield bond sales in the U.S. were for refinancing, marking the highest level since 2010. This surge in refinancing was driven by expectations of further interest rate cuts from the Federal Reserve, which bolstered investor sentiment in the corporate bond market. The Fed's recent decision to cut rates by 25 basis points created a favorable environment for companies looking to reduce borrowing costs and extend maturities, as many firms aimed to capitalize on the lower interest rate landscape.

Despite the challenges posed by inflation concerns and geopolitical uncertainties, the demand for corporate bonds remained robust. Investors were particularly drawn to the high-yield segment, as the potential for attractive returns in a low-rate environment became increasingly appealing. Additionally, the Bank of Canada signaled further potential rate cuts, further enhancing the attractiveness of corporate bonds as firms positioned themselves to take advantage of lower borrowing costs.

However, the overall economic outlook remained clouded by concerns surrounding the incoming Trump administration's trade policies, which could impact corporate profitability and borrowing conditions. The uncertainty surrounding inflation and

its potential impact on interest rates continued to loom over the corporate bond landscape, creating a cautious atmosphere among investors.

Moreover, the anticipated rebound in the Treasury market, driven by strong demand at Treasury auctions, signaled a potential shift in investor focus back to government securities. Nevertheless, the corporate bond market demonstrated resilience, with many companies successfully navigating refinancing efforts and maintaining access to capital. As 2025 approaches, market participants will be closely monitoring economic indicators and central bank actions to gauge the future trajectory of corporate bonds.

In the securities lending markets, corporate bonds generated **\$86M** in revenues during the month which represents a 6% increase YoY and a 1% decline MoM. Average fees remained aligned with those seen over the last few months, resting comfortably at 30bps. Balances declined slightly over the month falling from \$338.2B during November to \$333.4B during December.

Revenues across conventional bonds continued to fall month on month following the \$85.9M high posted during October. Average fees also dipped below 30bps, to 29bps, for the first time during 2024. Balances dropped heading into year end, declining by approximately \$4B. Balances remained significantly higher than those seen during December 2023 however, up over 21% YoY.

# Government Bonds

## Hawkish cuts cloud the market outlook.

In December, government bonds experienced significant fluctuations influenced by central bank policies and political developments. The Federal Reserve cut interest rates by 25 basis points, bringing the federal funds rate to a range of 4.25% to 4.5%. This decision, while anticipated, was accompanied by a more cautious outlook for future cuts, with officials signaling only two additional reductions expected in 2025. The Fed's hawkish tone led to a sell-off in U.S. stocks, with the Dow Jones Industrial Average dropping over 1,100 points, reflecting investor concerns about persistent inflation and a resilient labor market. In response to the Fed's announcement, Treasury yields rose sharply, with the yield on the benchmark 10-year note climbing above 4.50%, indicating increased borrowing costs and investor caution.

In Asia, the Bank of Japan maintained its policy rate at 0.25%, citing concerns over uneven economic performance and inflation trends that have remained stubbornly low.

In Europe, the European Central Bank (ECB) lowered rates for the third consecutive meeting, aiming to support a struggling economy amid political instability, particularly following the collapse of the French government led by Prime Minister Michel Barnier. The risk premium on French bonds surged to its highest level since 2012, reflecting growing investor unease regarding France's political landscape. The Bank of England, meanwhile, opted to

keep its interest rates steady at 4.75%, signaling a cautious approach amidst ongoing inflationary pressures and economic uncertainty. This decision reflected the Bank's desire to balance growth while managing inflation expectations.

Overall, bond markets faced considerable headwinds as geopolitical tensions, particularly surrounding U.S. trade policies and potential tariff increases, added to the uncertainty, leaving investors wary of future developments in the global economy.

In the securities lending markets government bonds generated **\$193M** in revenues, a 12% YoY increase and just shy of the 2024 monthly high of \$193.9M seen during October. Average fees increased by 1bps over the month to 18bps. Utilization reached a month high of 24.73% on December 19th following the Fed rate cut on December 18th. Utilization remained close to 21% for the remainder of the month.

Americas government bonds posted their highest monthly revenues since October. Average fees increased 2bps during the month to 19bps. Heading into year-end average fees continued to rise, reaching 23bps on December 30th.

Across Europe, demand was robust, with the highest monthly revenues of the year being seen (\$55.4M). Political uncertainty in France led to greater demand from borrowers. Average fees remained steady at 15bps as balances exceeded \$424B for the first time this year.

## December Fee Trend

These materials, including any software, data, processing technology, index data, ratings, credit-related analysis, research, model, software or other application or output described herein, or any part thereof (collectively the "Property") constitute the proprietary and confidential information of S&P Global Market Intelligence or its affiliates (each and together "S&P Global") and/or its third-party provider licensors. S&P Global on behalf of itself and its third-party licensors reserves all rights in and to the Property. These materials have been prepared solely for information purposes based upon information generally available to the public and from sources believed to be reliable.

Any copying, reproduction, reverse-engineering, modification, distribution, transmission or disclosure of the Property, in any form or by any means, is strictly prohibited without the prior written consent of S&P Global. The Property shall not be used for any unauthorized or unlawful purposes. S&P Global Market Intelligence's opinions, statements, estimates, projections, quotes and credit-related and other analyses are statements of opinion as of the date they are expressed and not statements of fact or recommendations to purchase, hold, or sell any securities or to make any investment decisions, and do not address the suitability of any security, and there is no obligation on S&P Global Market Intelligence to update the foregoing or any other element of the Property. S&P Global Market Intelligence may provide index data. Direct investment in an index is not possible. Exposure to an asset class represented by an index is available through investable instruments based on that index. The Property and its composition and content are subject to change without notice.

THE PROPERTY IS PROVIDED ON AN "AS IS" BASIS. NEITHER S&P GLOBAL NOR ANY THIRD PARTY PROVIDERS (TOGETHER, "S&P GLOBAL PARTIES") MAKE ANY WARRANTY, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, FREEDOM FROM BUGS, SOFTWARE ERRORS OR DEFECTS, THAT THE PROPERTY'S FUNCTIONING WILL BE UNINTERRUPTED OR THAT THE PROPERTY WILL OPERATE IN ANY SOFTWARE OR HARDWARE CONFIGURATION, NOR ANY WARRANTIES, EXPRESS OR IMPLIED, AS TO ITS ACCURACY, AVAILABILITY, COMPLETENESS OR TIMELINESS, OR TO THE RESULTS TO BE OBTAINED FROM THE USE OF THE PROPERTY. S&P GLOBAL PARTIES SHALL NOT IN ANY WAY BE LIABLE TO ANY RECIPIENT FOR ANY INACCURACIES, ERRORS OR OMISSIONS REGARDLESS OF THE CAUSE. Without limiting the foregoing, S&P Global Parties shall have no liability whatsoever to any recipient, whether in contract, in tort (including negligence), under warranty, under statute or otherwise, in respect of any loss or damage suffered by any recipient as a result of or in connection with the Property, or any course of action determined, by it or any third party, whether or not based on or relating to the Property. In no event shall S&P Global be liable to any party for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees or losses (including without limitation lost income or lost profits and opportunity costs or losses caused by negligence) in connection with any use of the Property even if advised of the possibility of such damages. The Property should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions.

The S&P Global logo is a registered trademark of S&P Global, and the trademarks of S&P Global used within this document or materials are protected by international laws. Any other names may be trademarks of their respective owners.

The inclusion of a link to an external website by S&P Global should not be understood to be an endorsement of that website or the website's owners (or their products/services). S&P Global is not responsible for either the content or output of external websites. S&P Global keeps certain activities of its divisions separate from each other in order to preserve the independence and objectivity of their respective activities. As a result, certain divisions of S&P Global may have information that is not available to other S&P Global divisions. S&P Global has established policies and procedures to maintain the confidentiality of certain nonpublic information received in connection with each analytical process. S&P Global may receive compensation for its ratings and certain analyses, normally from issuers or underwriters of securities or from obligors. S&P Global reserves the right to disseminate its opinions and analyses. S&P Global Ratings' public ratings and analyses are made available on its sites, [www.spglobal.com/ratings](http://www.spglobal.com/ratings) (free of charge) and [www.capitaliq.com](http://www.capitaliq.com) (subscription), and may be distributed through other means, including via S&P Global publications and third party redistributors.

## About S&P Global Market Intelligence

At S&P Global Market Intelligence, we understand the importance of accurate, deep, and insightful information. Our team of experts delivers unrivaled insights and leading data and technology solutions, partnering with customers to expand their perspective, operate with confidence, and make decisions with conviction.
