

# Annual Global Fibers Service

Comprehensive. Cohesive. Country-by-Country.

Textiles are made of different fibers – natural and man-made. In the last two decades, demand for man-made fibers like polyester, nylon, viscose, acrylic etc. has exceeded that of natural fibers like cotton, wool, silk etc. Supply and demand have seen a major regional shift for many of these fibers during this period.

## Data with More Depth

IHS Markit is now offering a comprehensive global fibers service covering extensive detail for major countries with the data updated annually. The IHS Markit Annual Global Fibers Service delivers data and analytics across all major natural and man-made fibers which account for more than 95% of global fibers consumption. The service combines country supply and demand data for the major fibers along with a 5-year history and 10-year long term outlook. Additionally, the report provides annual regional prices for many of these fibers.

## Key Products Covered

Polyester

Nylon

Acrylic

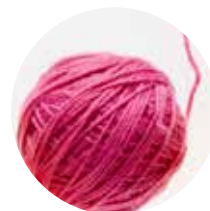

Cotton

Viscose

Polypropylene

Wool

Silk Fibers

## Key Benefits

Deep granular data at a country-by country level in a single service allows you to develop a robust business strategy.

- Understand the current global fiber market dynamics as well as historical perspective
- Learn about the largest importing and exporting countries for different fibers
- Assess fiber availability, inter-fiber competition and realistic opportunities for capacity investments

## Key Features

- Country level production, capacity, supply and demand data for different fibers in a single service
- 5-year history and 10-year forecast: The history and forecast outlook will indicate the changing supply and demand patterns for the last five years and an outlook by fiber type for the next 10 years
- Annual Regional Prices: 10-year pricing forecasts by region, linked to underlying energy prices, for many of these fibers will guide users on inter-fiber competition, the relative commercial attractiveness and indicate the impact of prices on demand patterns
- An executive global overview and regional executive summaries by our product experts will provide summaries of key market changes within the global fibers industry as well as a deep analytical assessment of the strategic drivers for different fibers
- Access to our deeply experienced global industry experts during the subscription period enables rapid client support and a verbal explanation of the key market changes and assumptions shaping our forecast fiber supply demand and pricing
