

Enhanced Ownership Data: Overview

Access global, cross-asset holdings information—thoroughly captured, managed, and integrated, and efficiently delivered

Combining numerous market sources, public filings, and our own content, our ownership data is potentially the most comprehensive and accurate in the industry. For example, we ensure 13-F filings data with multiple money management divisions that file one 13F for all are appropriately broken out to express true asset breakdown for each individual division. We also offer Asia-Pacific and emerging markets holdings information that is typically difficult to obtain.

Superior ownership data

- Combines superior content from industry-leading sources with our proprietary data collections
- Fast and efficient delivery of new and updated holdings information
- Transparency on a broad range of assets
- Access to difficult-to-obtain Asia Pacific and emerging markets data
- Common identifier across asset classes provides a unique, comprehensive view of a firm’s entire portfolio
- Seamless integration with Bigdough global contacts and investor profiles
- Data maintenance and oversight ensures superior data accuracy
