

VINtelligence VIN Specific, delivering the exact configuration of a vehicle

With the current level of vehicle data available, there are many unknowns that impact price, safety, and cost to repair. VIN Specific identifies a vehicle's trim, price, color, and equipped ADAS for each unique 17-digit vehicle identification number (VIN).

Book of business / fleet processing

Real time vehicle transactions

Risk modeling

- Analyze portfolio risk based on VIN Specific configurations / price
- Vehicle feature impact on loss risk

Underwriting

- VIN Specific vehicle description for accurate quoting / policy provisioning
- Enhanced user experience with quick, accurate quotes

Claims processing

- Vehicle level total loss evaluations based on exact specification/ configuration
- Aggregate claims analysis

Ease of use and integration

- The design of the VIN Specific enhancement builds upon the core VINtelligence application simplifying business processes and decisions. All data aligns to your existing implementation.

User flexibility – Batch / Real time

- The competitive price point of VIN Specific vehicle data in VINtelligence will enable processing large volumes of vehicles, in addition to supporting sub second real time transactions.

Expansive Coverage

- VINtelligence leverages a multi-sourced data strategy to provide expansive VIN Specific coverage within the car and light truck segment.

Focused VIN Specific strategy

- The future for VINtelligence revolves around the VIN Specific offering, with incremental attributes introduced based on market trends and needs.
