

## DealMonitor

Access and view new issue data in real time

### A component of our buy-side platform for primary issuance

Multiple solutions work together to optimize the new issue process for the buy-side community. One of those solutions is DealMonitor, which is designed to make deal terms and conditions more easily consumable by investors via an intuitive, easy-to-use interface.

### Consolidated deal information

DealMonitor addresses the challenge of fragmented, unstructured, new issue data from multiple sources and organizes information and documents into a single, intuitive dashboard.

### Efficient access

Buyside traders benefit from streamlined access to multiple deals from multiple dealers simultaneously across the capital markets.

### Deal tracking and audit

DealMonitor facilitates clean and precise recordkeeping of deal progress throughout the new issue process for portfolio management, trading, risk, compliance, and audit.

### Integrate with the full buy-side suite

DealMonitor is designed to integrate and connect seamlessly with other components of our buy-side suite of solutions.

### Real-time updates

Our platform provides real-time deal updates via pop-ups and customizable email alerts.
