

Japanese Dashboard 2.0

Centralized, auditable platform for Japanese retention transactions, enabling smooth execution of deal communication.

CUSTOMERS

Japanese Banks

The retention market in Japan requires communication of specific deal information between syndication after pricing. Japanese Dashboard 2.0 is a rebirth of our initial platform, giving banks the control and ease of use they need, executing the transactions at their own pace. It includes multiple stages, that are approved between all underwriters, with a leading bank controlling all information.

Japanese Dashboard 2.0 is a platform for communication enhancement, it helps a leading bank and all underwriters to execute retention deals with hassle-free way. It provides full capability to participant banks to communicate deal information, upload document, track completion of multiple stages that are approved between a leading bank and all underwriters with time stamp and generates an entire deal summary for an audit trail.

One platform for all banks offering a single location to revisit past transactions, and setup new.

Keep a full audit trail of all responses and deal terms communicated on the deal.

One click export of the transaction, enabling lead banks to easy communicate the terms to the issuer.

One login for banks that are leading, as well as underwriting.
