The MSCI USA Index measures the performance of the large and mid-cap segments of the US market. The index covers approximately 85% of the free float-adjusted market capitalization in US. IHS Markit provides the securities lending return made from securities in the index since 2015 and further provides a breakdown by fee categories, top sectors as well as the level of short interest in the index constituents. There are currently 637 securities in the index and all the securities are on loan.

### Indexed Short Interest

Indexed Short Interest tracks the daily change in short interest relative to market capitalization calculated for the MSCI index with an index base date of 1st Jan 2015 where the index is set to a base value of 100

### Returns from Securities Lending

Returns from securities lending relative to lendable value from only those lender funds with active loans in respective market areas that are part of the index. Funds are classified on a daily basis for individual market areas. This metric is used in the report unless stated otherwise.
