

Oil Terminal Analytics Tool

Understand Global Oil and Liquids Storage Terminal Capacity in a time of need

The Oil Terminal Analytics Tool, derived from IHS Markit's Energy Infrastructure and Markets Database, will save you time monitoring liquids storage portfolios worldwide as well as identifying the most competitive terminals based on storage capacity, product flexibility and number of transportation access types. The Oil Terminal Analytics tool is built upon a comprehensive global oil and LPG/NGL terminal and storage database which is updated continuously by a team of analysts around the world.

The Oil Terminal Analytics Tool is now available to clients on Connect® and allows customers to:

Understand liquid **storage capacities** for crude oil, refined products, NGLs & LPG on a facility basis worldwide

Monitor liquid storage **portfolios** for any company, country or region worldwide

Track storage capacity tied to **refineries** or **global oil hubs**

Identify **most competitive terminals** based on capacity, flexibility and access/connections

Gain robust access to Power BI based analytics dashboards:

- Global company storage portfolio:** Compare the terminal portfolios of different companies in terms of market share, storage capacity, countries covered and their concentration to global oil hubs.
- Company storage portfolio by country:** Quickly understand the competitive environment within a specific country in terms of market share, storage capacity and type.
- Company terminal portfolio by country:** Gives the user the possibility to better understand the competitive environment within a specific country in terms of access types, products handled and overall quantity of terminals.
- Complexity:** Allows the user to assess the competitiveness of an individual or group of oil terminals based on its or their number of access types, product flexibility and storage capacity.
- Connectivity:** Enables the user to assess the competitiveness of terminals within a specific city in terms of surrounding infrastructures available.
- Final terminal score:** Gives the user the possibility to benchmark worldwide terminals.
- Terminal score details:** Helps to understand the score of each terminal based on their number of access types, storage capacity and products handled.
- City ranking:** Allows the user to go through the overall score of terminals within a specific city, highlighting the competitiveness of different hubs.

Highlights:

+7 200
crude oil, refined product, NGL & LPG terminals

165
countries worldwide

2.3 billion
cubic metres of total liquids storage capacity (March 2020)

+1 300
searchable company portfolios

Weekly
data updates
