Chemical Economics Handbook
Your one-stop resource for chemical market information
Access Comprehensive Chemical Industry Data and Analysis

Strategic business planning takes time. And much of that time involves finding, gathering, reconciling, and verifying the data you need to make informed decisions. Our information and analysis allows you to spend your time making decisions rather than preparing for them.

Launched in 1950, the Chemical Economics Handbook (CEH) is the world’s leading chemical business research service. Offering information on over 300 chemicals and chemical markets, it can help you better understand both the global chemical industry and specific market environments. CEH lets you spend your time where it matters most—making decisions.

Gain an In-depth Understanding of Individual Chemical Markets

With CEH, you don’t get data on just some of the chemical markets—you gain access to detailed, unbiased information and analysis for all major large-volume chemical markets. This information is delivered through reports that provide five-year outlooks and vital market data for individual chemicals or chemical groups. The reports contain information on supply, demand, manufacturing processes, trade, and prices. You can be assured that the information fueling your important decisions is thoroughly researched and reviewed.

Subscribe today

While CEH individual reports are available for purchase, most clients benefit from an annual subscription to the service. A subscription offers insight into the highly interconnected chemicals markets by providing access to:

- 250+ Reports
- Access to exclusive subscriber website
- Chemical experts who can answer questions about the findings in the reports
