

Rushmore Abandonment Performance Review

Since 2008, Operators have been sharing data from their permanent well abandonments through the Rushmore Abandonment Performance Review (APR). Rushmore members use this global dataset to gain crucial insight into decommissioning best practices, enabling them to target significant time and cost savings in their abandonment campaigns.

Global Coverage

Review well abandonments across the world:

Expansive Data Set

Access data on a rapidly increasing number of well abandonments:

- # of Wells Published (Data available today)
- # of Wells Received (Data to be published soon)
- # of Wells Due (Data due from new members)

Position Yourself Amongst the Best

Discover best practices from peer operators and improve your abandonment campaigns:
