# About Maritime, Trade & Supply Chain Solutions

Technology, regulation, market risk and geopolitical threats have made the world's oceans challenging to navigate both profitably and safely. Accurate and timely intelligence enables the market to understand global trade flows to make confident business critical decisions and maximize ROI.

Maritime, Trade & Supply Chain is the trusted source of maritime and data, research, analytics and consulting services, with a global customer base of over 8,000 commercial and public sector organisations.
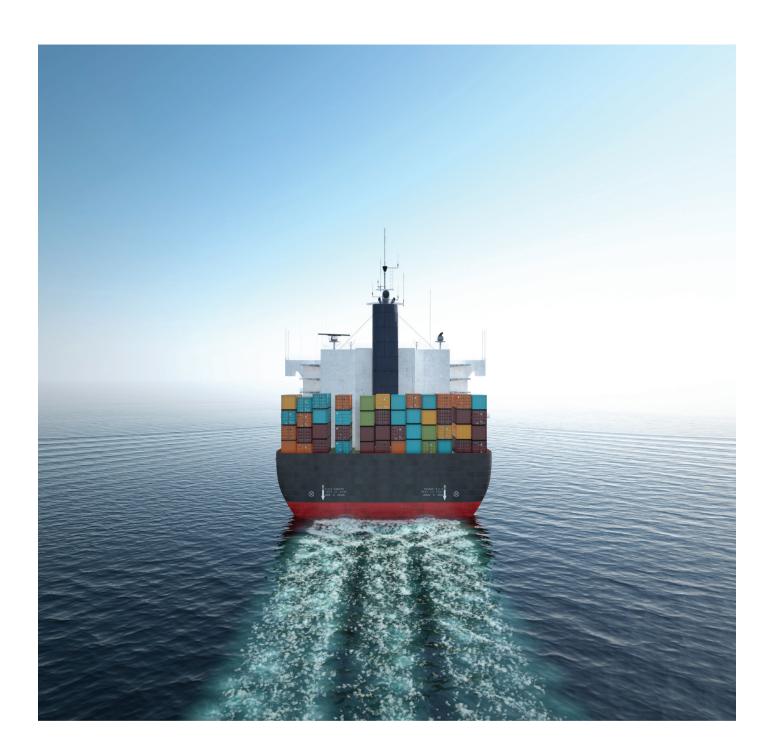

Our capabilities and expertise enable our customers to manage complex global supply chains profitably, efficiently and safely.

## Our core capabilities include:

– The world's most comprehensive database of vessels, 100 GT and over

– The world's largest network of land-based and satellite AIS receivers providing real-time coverage of live vessel positions

– The largest database of bilateral trade statistics covering 104 countries and over 90% of total global trade

– PIERS database of U.S. seaborne imports and exports at highly-granular bill of lading level of detail

– Industry-leading conferences around the world including TPM, attended by over 2,000 delegates annually

The combination of these capabilities, in addition to data modelling, macroeconomic and industry expertise enables us to provide unique analysis and forecasts addressing strategic issues for our customers. These include detailed forecasts of global trade by commodity and transportation mode, shipping fleet capacity and freight rate forecasts, and the creation of bespoke market studies for clients in support of specific industries, regulatory or investment requirements.

Our Maritime, Trade & Supply Chain solutions empower customers to make better decisions through the use of superior intelligence and uniquely complementary data sources across the entire value chain (Bill of Lading, Ship Intelligence, Ship Movement, and Trade Intelligence).
