iBoxx® Contingent Convertible Indices

Transparent, independent, objective, and multi-dimensional coverage across all asset classes.

The iBoxx Contingent Convertible Indices represent the developed and emerging market Contingent Convertible (CoCo) fixed income market for EUR, GBP and USD denominated bonds. The iBoxx Contingent Convertible index family tracks the performance and emergent issuance of Basel III compliant Additional Tier 1 (AT1) and Tier 2 (T2) CoCos by banks, and of Restricted Tier 1 capital (RT1) by insurance companies, which as of June 2019 stands at more than $225 billion outstanding.

The European Commission’s Capital Requirements Directive IV is the EU implementation of Basel III. This implementation and those by other regulatory bodies worldwide have led to an increase in the issuance of CoCos which are designed to satisfy the loss absorbing capital requirements of banks and insurance companies under Basel III.

Sub indices for AT1, T2 and RT1 capital tiers allow for detailed multi dimensional analysis of the underlying market.

The indices are part of the global iBoxx index families, fueled by multi-source pricing. iBoxx indices offer representative and objective benchmarks for assessing the performance of bond markets and investments.

Transparency
Documentation on our rules-based methodology for constituent selection, monthly rebalancing and daily total return calculations is publicly available.

Independence
iBoxx® products utilise independent multi-source pricing and reference data subject to rigorous quality testing, with a fully documented price challenge process in place. We are committed to administering all financial benchmarks in compliance with IOSCO benchmark principles and are an authorised benchmark administrator under the European Benchmark Regulation (BMR).

Multi-dimensional analysis
A wide range of analytical values are published to support risk, performance measurement and attribution analysis.

Flexibility
iBoxx® offers the ability to customize indices to meet specific criteria.

Depth of Data
A broad history of index and sub-index returns and analytics are available and published frequently to support index analysis.
