## Sustainable1 and KY3P®

# An integrated approach to building a resilient, sustainable vendor ecosystem

Outsourcing can be both a competitive advantage and a significant risk factor. With mounting investor scrutiny on multiple aspects of sustainability and intensifying directives and regulations, comes a growing need to factor the sustainability profiles of vendors at every tier in the outsourcing equation. From net zero goals and human rights records to labor practices and business ethics, sustainability considerations have the potential to cause significant reputational and economic damage—or elevate your organization's overall sustainability credentials.

To help you navigate this complex and evolving aspect of vendor management, S&P Global brings the in-depth sustainability intelligence of Sustainable1 to KY3P, an integrated suite of vendor risk management solutions.

#### Sustainable1

Comprehensive global coverage across global markets and in-depth sustainability intelligence provide expansive insight on business risk, opportunity, and impact as we work towards a sustainable future.

#### KY3P

An integrated solution suite streamlines third-party due diligence, provides end-to-end visibility across the entire supply chain, and provides ongoing updates and alerts about emerging risk situations.

### **Key Stats**

80% of firms have suffered a breach due to a third party.

77% of firms say they have limited visibility into third-party vendors.

80% of emissions generated by firms are scope 3.

### Together, Sustainable1 and KY3P are redefining TPRM for a sustainable future.

Collect and monitor third-party data

Streamline due diligence workflows

Accelerate vendor onboarding

Analyze sustainability criteria for vendors

Maintain visibility across the vendor ecosystem

### Vendor management for a transitioning world

Access a single solution that provides tools and frameworks to strengthen end-to-end vendor management, plus sustainability intelligence, and risk analysis.

- Identify and manage the security, financial, legal, sustainability, business continuity, and reputational third-party risks that jeopardize the supply chain and the broader organization.
- Gain unparalleled insight into vendor performance on sustainability factors such as net zero, energy transition, sustainable financing, regulatory compliance, and more.
- Combine sustainability intelligence with cybersecurity and financial ratings, sanctions data, news alerts, cyber event data, and third-party questionnaires to collect and maintain a complete view of vendor risk.
- Standardize onboarding, due diligence, inherent risk calculation, oversight, and off boarding of third party products, services and outsourcing arrangements.
- Distribute standardized on-site, desktop, or express assessments based on market standard criteria and developed by accredited partners.
- Identify the vendors whose commitment to sustainability represents a competitive advantage and the potential for value creation through innovation.
