

Chassis Service

Chassis technology is responsible for a vehicle's overall performance in terms of dynamics, safety, and fuel efficiency—in short, a key contributor to a vehicle's competitive performance. Furthermore, through the use of advanced materials, it has a significant role to play in reducing carbon dioxide output.

The IHS Markit Chassis Service provides insight, context, data, and analytics for the key chassis components—braking, steering, suspension, and tires.

Users can quickly access key insights from market developments, put context around events and technology trends, dive into deep data and forecasts, and seamlessly drive analytics to support their most challenging decisions.

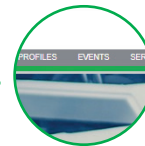

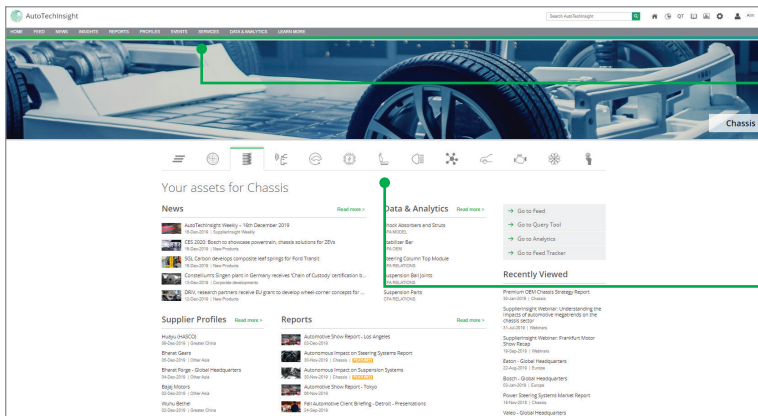

Topics covered

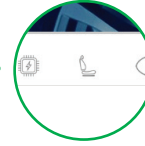

Planners and strategists use the service to:

- Assess and forecast new chassis technologies
- Analyze the competition
- Understand OEMs' purchasing strategies
- Evaluate customers' technology adoption paths

Available through AutoTechInsight:

Drop-down menu to quickly and easily access News & Insights, Reports, Supplier Profiles, Services, Data & Analytics, Events and more.

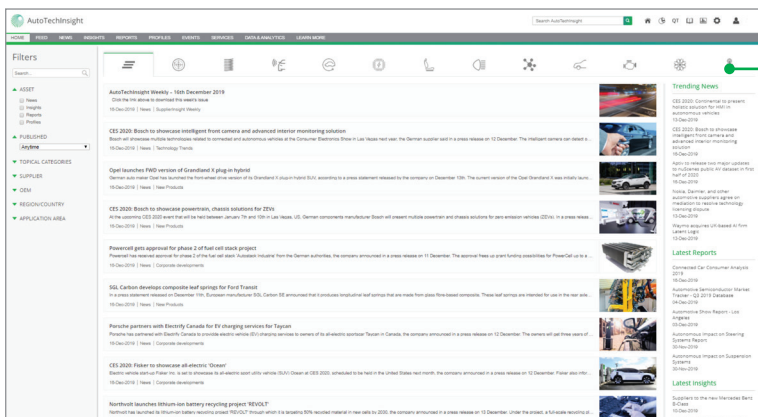

Home page dedicated to your subscription and purchased content.

Tabs for all 12 services where you can filter down and explore each service in detail.

View trending news.

The **Chassis Service** is part of a suite of vehicle contenting services. Delivered through AutoTechInsight, an IHS Markit automotive strategy and planning solution, the service provides a view into current automotive trends and future demand through

- Sector news and insights
- Topical reports
- Supplier profiles
- CFA-Relations (OEM-Supplier relationships, both analyst and survey-based researched databases)
- Access to analysts and webinars
- OEM-level and model-level forecasts, technology fitment, and supplier relationships (optional add-ons)
