

# Interior Comfort & Passive Safety Service

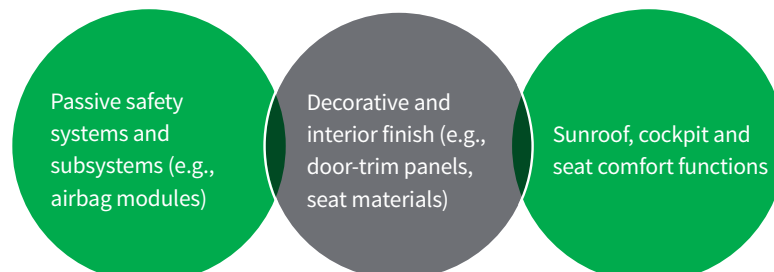

A vehicle's interior is a combination of style, comfort, safety, and usability. The types and quality of material, the functionality, and the aesthetic all play a part in the desirability and consumer satisfaction of the vehicle.

Furthermore, emission compliance is driving the use of lighter materials to reduce mass, and a focus on sustainability is driving the use of more natural materials.

The IHS Markit Interior Comfort and Passive Safety Service provides insight, context, data, and analytics for the key systems that make up a vehicle's interior and for how materials and functionality are changing to meet consumer demand and emission compliance.

Users can quickly access key insights from market developments, put context around events and technological trends, dive into deep data and forecasts, and seamlessly drive analytics to support their most challenging decisions.

## Topics covered:

Passive safety systems and subsystems (e.g., airbag modules)

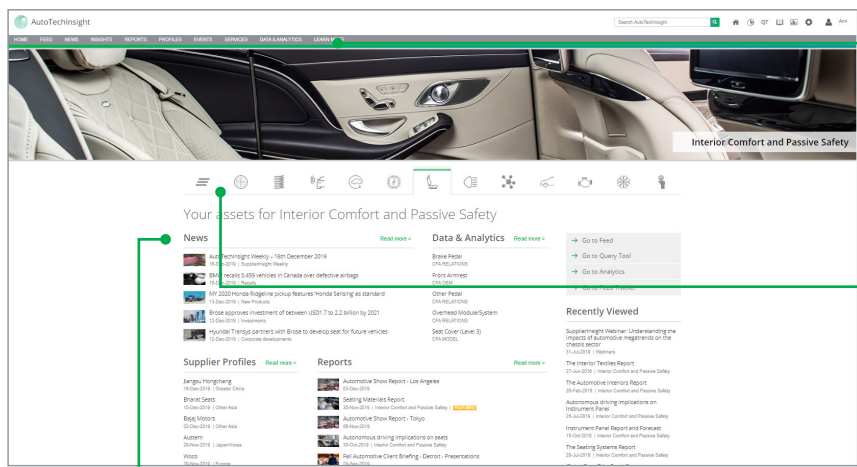

Decorative and interior finish (e.g., door-trim panels, seat materials)

Sunroof, cockpit and seat comfort functions

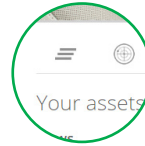

## Planners and strategists use the service to

- Assess the evolution of materials used in a vehicle's architecture
- Analyze how the competition is advancing weight reduction strategies
- Get an assessment of what has succeeded
- Understand OEMs' purchasing strategies

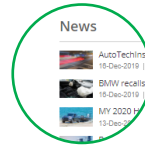

## Available through SupplierInsight:

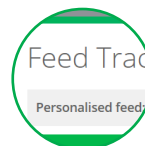

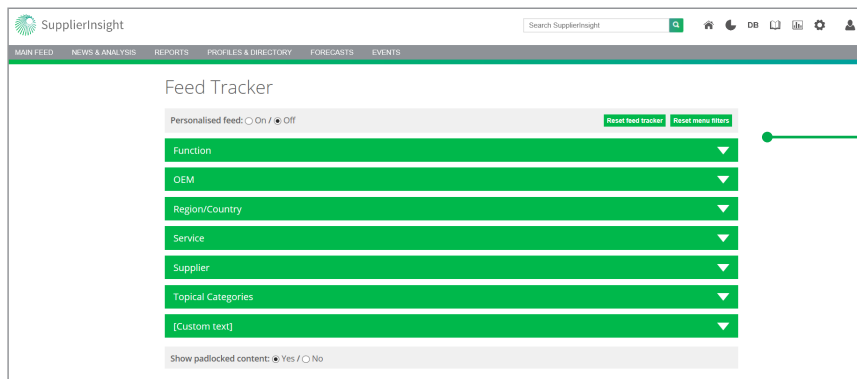

Tabbed format to access News & Analysis, Reports, Supplier Profiles and a listing of our Component Forecast coverage and Industry Events

Ability to explore multiple services, with the ability to filter down to a specific service
