

AutoTechInsight

Identify opportunities and improve profitability
with our suite of component and technology
product planning and strategy service

AutoTechInsight from IHS Markit is a business intelligence platform providing access to a wealth of original research, analysis, forecasting, and thought leadership on automotive technology, the vehicle ecosystem, and the supporting supply chain

AutoTechInsight has the widest and deepest coverage on vehicle technology, ranging from e-mobility hardware and autonomy-enabling hardware to traditional domains, such as chassis and interior, which are being impacted by the automotive industry's megatrends.

AutoTechInsight serves this wealth of intelligence through a variety of asset types, from daily news and insights to granular data sets and insightful analytics. A variety of automotive stakeholders use AutoTechInsight for making critical business decisions on an ongoing basis.

300+
technologies covered

3,000+
suppliers tracked

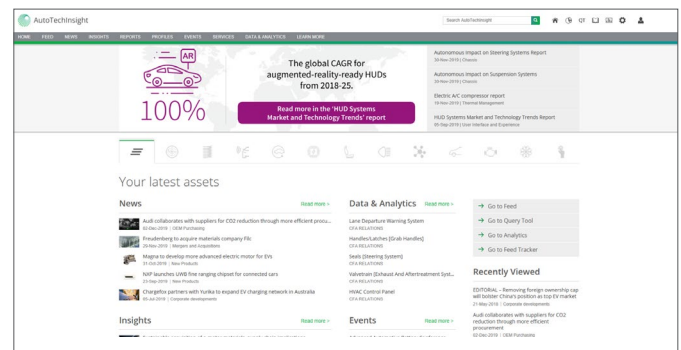

12
domains (from Autonomy
to UI/UX)

75+
analysts globally

100's
of persona-specific analytics

AutoTechInsight Services

Offering a lens into a **dozen vehicle component categories** featuring news and insights, reports, profiles, and more

Each of the 12 services provides the insight you need to anticipate future demand, access competitive intelligence, and stay abreast of changing dynamics.

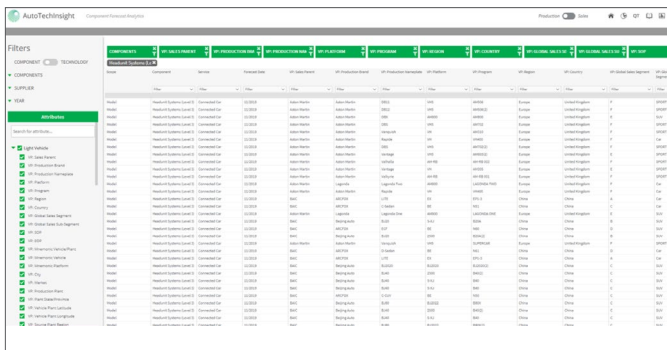

- Autonomous driving
- Chassis
- Connected car
- E/E and semiconductor
- E-mobility
- Interior comfort and passive safety
- Lighting
- Materials and lightweighting
- OEM strategy
- Powertrain components and technologies
- Thermal management
- User interface and experience (UI/UX)

Subscriptions are available by service or by asset type (news, profiles, reports). For example, you can subscribe to the Autonomous Driving Service and receive all assets related to that service. Or you can subscribe to an asset such as "Profiles" and get all the profiles across the 11 services.

AutoTechInsight's landing page is the gateway to IHS Markit's component and technology research, thought leadership, and analysis.

Component Forecast Analytics

Providing timely, reliable, and comprehensive automotive **component forecasts**

Component Forecast Analytics (CFA) provides current and prospective granular data on 150+ monthly updated components and subsystems, as well as 75+ analytics to address specific workflows and questions that are common to those wanting to understand more about the auto supplier sector.

Three levels of granularity are available:

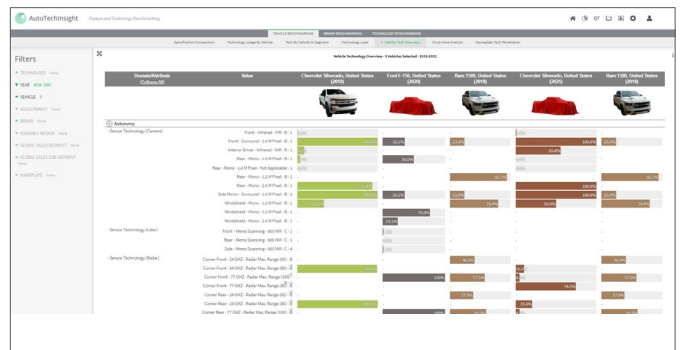

CFA model: Six-year model-level forecasts for over 90 components with model-level database and 75+ analytics. Available by component or subsystem, and some forecasts extend beyond six years.

CFA OEM: Six-year OEM-level forecasts for over 150 components, with OEM-level forecast database and 35+ analytics. Available by individual component.

CFA relations: OEM-supplier relationships identified for over 600 components across 11 domains. This includes relational OEM-level database and five analytics. Available by domain.

Features & Technology Benchmarking

Unprecedented ability to **compare automotive technologies** and specifications side-by-side

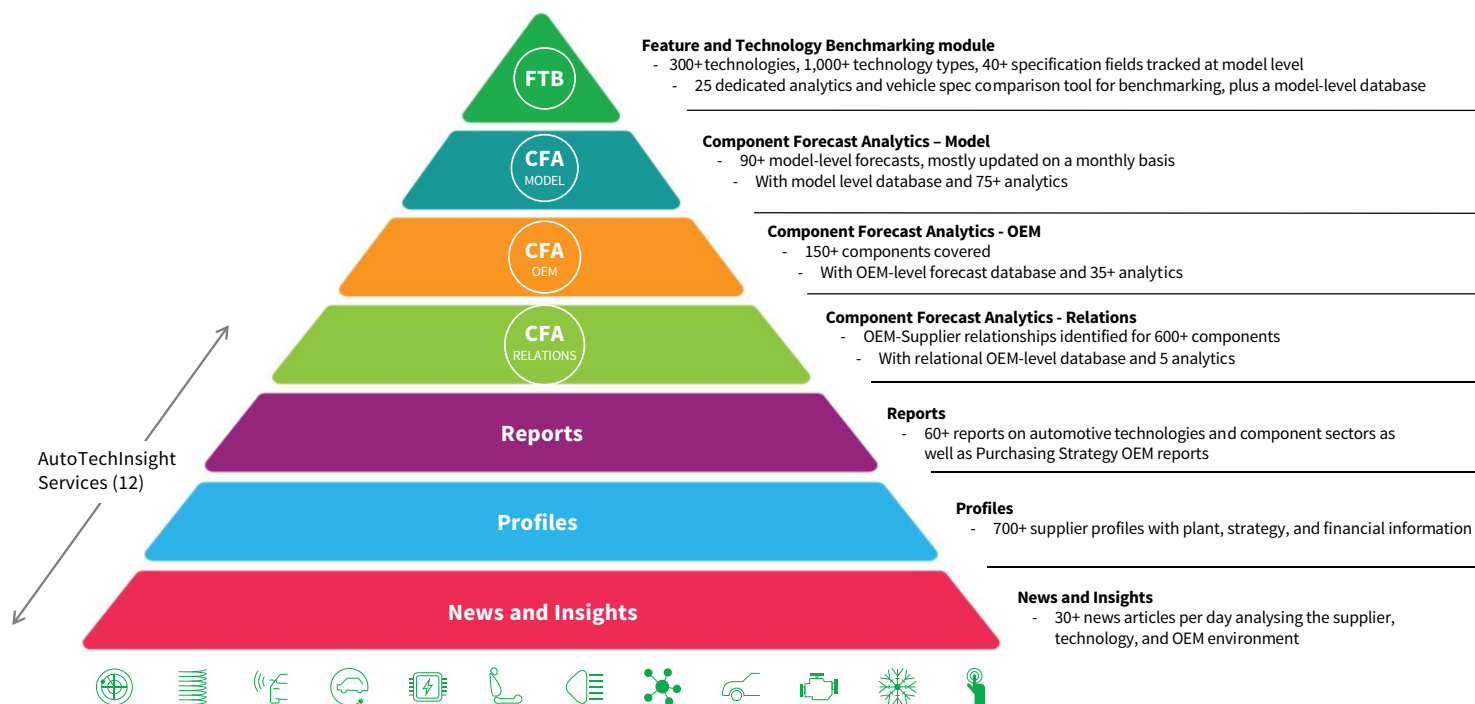

Features and Technology Benchmarking (FTB) provides automotive stakeholders with visibility into current and future OEM technology and feature strategies backed by granular data on over 300 technologies based on the IHS Markit vehicle and powertrain forecasts.

On top of granular data at the model level, the tool also provides intuitive analytics to help benchmark individual models and brands, understand their strengths and weaknesses, and identify gaps in carmakers' feature offerings and future must-have technologies.

- 300+ technologies
- 1,000+ technology types
- 40+ specification fields
- 4,000+ vehicles
- 250+ brands
- 25+ analytics and a vehicle spec comparison tool
- Six-year forecasts

*Some forecasts extend beyond six years
