CLO trend Q2 2019

Overall pace of CLO market picks up in Q2; new issue spreads set the tights

- AAAs settle in the 120-M130s for 2 to 3 year reinvestments versus the 130s-M140s for 4 to 5 year reinvestments.
- New issue prints have shown strength in the last few weeks, bifurcated largely by portfolio and manager quality.
- US YTD issuance hovers at ~\$62bn from 125+ deals, while Europe YTD issuance is ~€13.1bn from 31 deals.
- Q2 2018: issuance in the US was ~\$66bn from 120+ deals, and ~€13.3 from 32 deals in Europe.

Top tier managed bonds widened out slightly ~15-20 bps towards the end of June, while lower tier bonds edged out further to trade in the H600s/L700s DM. Europe continues to hold well, with 2.0 BBs trading inside of 600 and 3.0s in the M620s, converging on the tighter end of the US 2.0 BBs. Arbitrage concerns and the lack of loan supply around good quality credits are continual themes in both markets, though whether these headwinds pose a real threat to CLO creation remains to be seen.
