

BiDCOMP™

The industry standard competitive bid calculation system.

BiDCOMP allows underwriters to access deal information from a universal competitive sale calendar. This information is then used to create bids. As a bid is created, BiDCOMP automatically checks against the bid parameters in the database and alerts the user to any violations.

Together with Parity, BiDCOMP provides an efficient and secure process for underwriters to submit bids and for issuers to receive bids. Both issuers and bidders benefit from added speed and efficiency when conducting transactions, and the assurance that all calculations meet SIFMA standards.

- **Check for violations** using parameters supplied on the Notice of Sale and alert the user as necessary.
- **Date and time-stamp** all bids
- **Robust reporting options**
- **One-click functionality** for term bonds, what-if scenarios, and auto-leveling.
- **Refine bid information up to the last minute** to reflect changing market conditions.
- **Submit bids securely** using 128-bit encryption.
- **Download deals to Municipal Bookrunning** system in a single click.
- **Send up-to-the-minute market knowledge** while creating a bid by feeding pre-sale orders directly into BiDCOMP from Electronic Order Entry.
- **Ensure calculations meet all SIFMA standards**
- **Access solely through a private network**, either via dial-up or leased line.
