

Ipreo MuniAnalytics

Comprehensive municipal securities database

With an easy-to-use interface and access to timely and accurate information, Ipreo MuniAnalytics provides broader depths of new issue data previously unavailable to the marketplace. Municipal market participants can access flexible screening tools, data analytics, and comparison tools.

Ipreo MuniAnalytics is integrated within our municipal bookrunning system and is a component of Ipreo MuniC, our suite of muni data applications that collectively provide the full range of municipal market information, both historical and in real-time.

Filter and search

- Filters are grouped into menus for fast and easy look-up
- Extensive list of items including deal, series, syndicate and scale (including coupons, pricing and CUSIP numbers)
- Search engine allows more intricate queries using detailed operators and selection criteria
- Quickly select from a list of frequently used queries
