

Engineering Workbench

Leverage advanced technologies to connect trusted knowledge to your engineering and operational workflows

Engineering Workbench

is the world's leading Engineering Intelligence Solution. By leveraging advanced technology to connect trusted knowledge to customers' workflows, the tool enables technical professionals to mitigate risk, increase efficiency and accelerate innovation.

The C-suite today is looking to the technical enterprise to directly contribute to growth, cost optimization, and risk management objectives. To stay competitive, engineers need access to technical content and insights paired with analytical capabilities and problem-solving tools tailored to their specific research needs and workflows.

Traditionally, engineers have had difficulties accessing the information and tools they need to solve problems quickly, make informed decisions and support their organizations' objectives. In fact, research shows that, on average, engineers consult 13 internal and external information sources to solve any given problem.

Consequently, engineers spend 40% or more of their time just searching for information. Then, once they find the information, these professionals typically lack the analytical and problem-solving tools tuned to their specific workflows, making it difficult and laborious to derive the best insights and solutions.

A Knowledge Platform for the Technical Enterprise

Engineering Workbench by IHS Markit is a breakthrough solution that enables knowledge professionals to rise above these information challenges, beginning with a platform that links technical content from many disparate and unstructured sources. Applying advanced search technologies and content analytics to federated information, Engineering Workbench quickly surfaces precise answers amongst the disparate data.

The Engineering Workbench overlays this integrated content with analytical and problem-solving capabilities designed with the technical professional in mind, accelerating decision-making. As a result, product teams deliver innovations to market ahead of the competition, researchers discover more efficient processes sooner, and engineers solve problems faster – driving growth, profitability and risk mitigation.

Engineering Workbench incorporates groundbreaking search capabilities that connect engineering and other technical professionals across the enterprise with the must-have content they need to complete their projects, including standards, eBooks, patents, journal articles, reports, design principles, and more, fostering knowledge retention and discovery.

Harnessing the Power of AI

The Artificial Intelligence (AI) technologies are swiftly moving beyond a back-end tool into taking on more sophisticated roles. By employing the AI technologies with trusted content, the Engineering Workbench enables engineers deliver real outcomes faster. With AI, we are introducing new award winning innovations like:

- Cognitive search
- Recommendation engine
- Machine learning
- Natural language processing
- Virtual “Research Assistant”

With powerful analytics that extract answers and insights from these disparate content sources, Engineering Workbench breaks down barriers to informed decision-making. These powerful tools are designed by technical professionals, for technical professionals, so they inherently support the daily workflows of engineers, scientists and other knowledge workers

VALUE DELIVERED:

For Engineers, Scientists, Researchers and Related Professionals: Discover solutions to technical challenges quickly to accelerate R&D and problem solving, and minimize rework in the design cycle

For Engineering and Research Program Management: Consolidate information sources to make your engineering teams more efficient and collaborative, while reducing costs and simplifying processes.

For Corporate Librarians and Standards Managers: Increase utilization of knowledge sources and improve relevance of technical answers provided to engineering and R&D teams.

For Executive Management: Deliver new innovations to market faster to grow revenue; increase engineering productivity and prevent redesign/rework to improve profitability; and ensure problems get solved faster to mitigate risks.

About IHS Markit

IHS Markit (NYSE: INFO) is a world leader in critical information, analytics and expertise to forge solutions for the major industries and markets that drive economies worldwide. The company delivers next-generation information, analytics and solutions to customers in business, finance and government, improving their operational efficiency and providing deep insights that lead to well-informed, confident decisions. IHS Markit has more than 50,000 business and government customers, including 80 percent of the Fortune Global 500 and the world's leading financial institutions. Headquartered in London, IHS Markit is committed to sustainable, profitable growth.
