

# AccuMap™

A rigorous data management and analytical tool that will help you find opportunities, create presentation-quality maps, and make faster business decisions.

IHS AccuMap delivers tightly-integrated information and functionality to support exploration and development in the Western Canadian Sedimentary Basin, the Frontier areas and the Williston Basin.

Well known for its ease of use, rich datasets, education, training and support, AccuMap provides you with the ability to work through a play from discovery to production, all within one application.

## YOU ASKED. WE LISTENED.

Our developers work hard to make AccuMap a tool that exceeds your expectations, with:

- The addition of the Microsoft® Ribbon for intuitive access to tools and the ability to specify favorite views
- The ability to quickly view multiple datasets to see the big picture opportunity
- New advanced tools to help you better analyze your area of interest, including Profile Viewer, 3D Wellbore Viewer and a Correlation Module

## Customer feedback has provided the foundation to deliver functionality that complements your daily workflow.

- IHS Markit conducts regularly-scheduled meetings with customer Special Interest Groups that result in developing an action plan around future development.
- Through the course of our meetings, customers asked for improved information currency, changes to the user interface, integration among our platforms to streamline workflows, enhancements to key databases and increased access to our domain experts. You asked and we delivered.

Modules built for how, where, and when you'll use them

## IHS Markit continues to be your partner in your day-to-day decision making, with AccuMap being the solution shaped by industry, for industry.

Combine your experience and insight with the extensive datasets in AccuMap modules to develop the land, geological, and geophysical picture of your area of interest.

Refine your queries and filter the data, share that data between selected modules, and quickly develop the map you need for a presentation.

### Base Module:

- General culture data:
  - survey grid
  - roads
  - rivers
  - towns
- Well status and locations:
  - bottom hole
  - surface hole
- Well license information
- Basic production information

### Additional Modules:

- Geology
- Production History
- Core Analyses
- Correlation Module
- Directional Surveys
- Drill Stem Test Data & Images
- Fluid Analyses
- Frac
- Gas Analyses and Pressures
- Land
- Land Text
- Historical Land Sales
- Enhanced Pipelines and Facilities
- Low Pressure Gas Pipelines
- Field, Pool & Unit Boundaries
- Seismic Location Data
- Energy Documents
- Oil & Gas Incident Manager
- Transportation and Infrastructure Data
- Well Spacing

AccuMap is the industry's trusted mapping solution to help you find opportunities, and make critical business decisions faster

<p><b>Geology</b></p> <p>Combine your experience and insight with the ability to customize your contours to clearly visualize your areas of interest and quickly develop the map you need for presentation.</p>	
<p><b>Land</b></p> <p>IHS Markit continues to invest in the quality of our information through additional Open Crown layers and Saskatchewan Freehold updates.</p>	
<p><b>Engineering</b></p> <ul style="list-style-type: none"> <li>- Customize AccuMap to display your data in mixed units and see your depths in metric and your production in imperial.</li> <li>- Choose the Production Graph that best fits your workflow and easily add a simple Decline Analysis curve.</li> <li>- AccuMap has expanded its graphing capabilities with a gas material balance graph.</li> <li>- The 2D well profile viewer allows you to quickly assess your wellbore including digital logs, tops and completions.</li> <li>- The Frac module gives you access to critical data that provides insight into historical well completions.</li> </ul>
