documents digitised on behalf of financial firms every month

**5**

languages covered

**167**

physical commodity warehouses integrated to date

**7**

base metals covered

### CUSTOMERS

**Commodity traders**

**Trade financing desks**

**Hedge funds**

**Consumers of physical metals**

Markit Commodity Tracker captures and digitizes the flow of paper inventory documents. This provides customers with a near real-time view of their physical commodities inventory.

Commodity desks are under increasing pressure to improve their cost and risk management. Logistics teams are burdened with managing a diverse flow of paper documents, from warehouse inventory reports to bills of lading. These documents arrive in multiple languages, formats and unit standards. Manually capturing and reconciling data from these hundreds of paper documents every month is expensive and error-prone.

Available as a secure web-based portal, Commodity Tracker seamlessly transforms your existing paper inventory documents into digital data. The system analyzes the documents, and uses them to construct an accurate live view of a firm's global inventory, whether in storage or in transit. Data capture and document management is automated for logistics teams, improving speed, accuracy and efficiency without requiring your vendors or partners to change their processes.

### Improved efficiency

Inline receipt of incoming documentation combined with an API allows full automation of all inventory updates, eliminating the need for manual data entry

### Reduced risk

Optical character recognition (OCR) technology is enhanced with machine learning-powered cognitive automation, to improve data quality

### Value-added data

Accessible near- real-time views of current inventory status per location provide new insight for business decisions

### Reporting

Industry standard csv download report, able to be exported and sent on a repeatable, scheduled basis or immediately presented for ad hoc requirements

### Interoperability

API access can be configured for direct integration into existing trading and risk systems, enhancing reconciliation activities

### Document repository

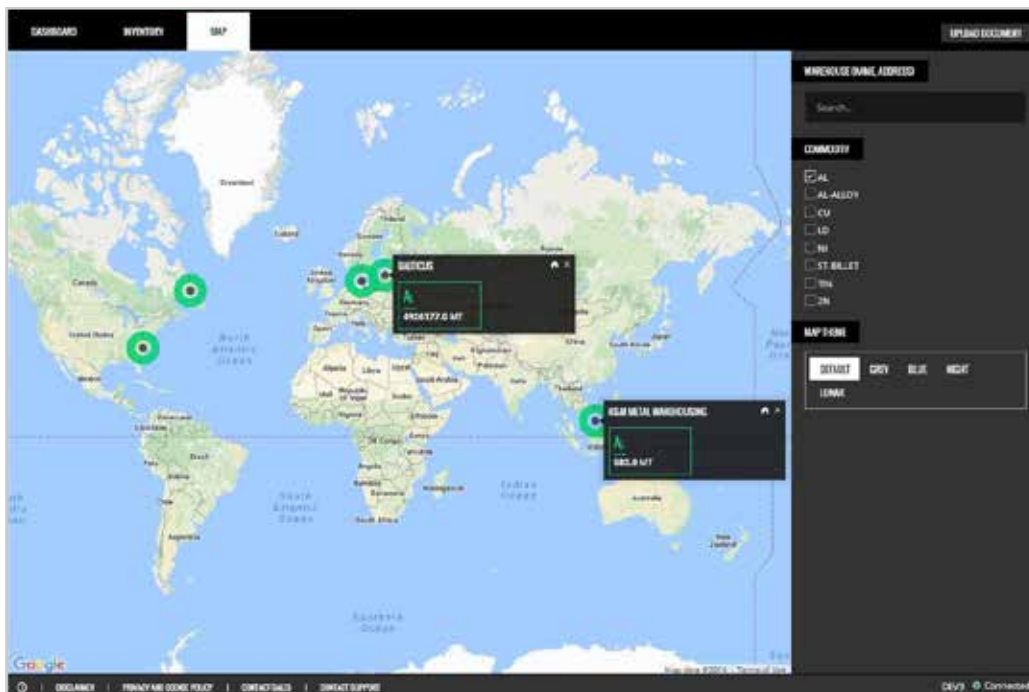

All documents received are saved and stored in a hosted environment, enabling audit and risk compliance

## Commodity Tracker: dashboard

The dashboard shows a list of document reviews with the following columns: DOC REVIEW, Date/Time, Location, Status, and Document Name. The status can be 'APPROVE' (green) or 'PFR' (orange).

DOC REVIEW	Date/Time	Location	Status	Document Name
DOC REVIEW	23 Sep 15 05:15:42	BALTIKUS Surabaya	APPROVE	SAMPLE.COM.BALTIKUS.PDF
DOC REVIEW	23 Sep 15 05:20:55	KAM METAL WAREHOUSING Singapore	APPROVE	SAMPLE.COM.KAM.PDF
DOC REVIEW	23 Sep 15 05:20:40	PACORINI Rotterdam	APPROVE	SAMPLE.COM.PACORINI.PDF
DOC REVIEW	23 Sep 15 05:19:24	GOLDEN STEVEDORING Marse	APPROVE	SAMPLE.COM.GOLDEN.PDF
DOC REVIEW	23 Sep 15 05:19:06	PACORINI Bilbao	PFR	SAMPLE.COM.BIL.PDF
DOC REVIEW	23 Sep 15 05:21:03	PACORINI Shanghai	PFR	SAMPLE.COM.TONG.PDF
DOC REVIEW	23 Sep 15 05:20:20	ALCOA Base Comrau	APPROVE	SAMPLE.COM.ALCOA.PDF
