

Formaldehyde & Resins

Contents

Introduction

- Preface and Contacts
- Products Covered
- Conversion Factors

Executive Overview

Background

- Introduction
- Urea formaldehyde resin
 - Introduction
 - Wood Adhesives
- Phenol-formaldehyde resins
 - Introduction
 - Wood Adhesives
 - Insulation
 - Molding Compounds
 - Laminates
 - Other
- Melamine-formaldehyde resins
- Polyacetal resins
- Pentaerythritol
- Methylene Diphenyl Diisocyanate
- 1,4-Butanediol
- Hexamethylenetetramine
- Slow-Release Fertilizers
- Herbicides
- Paraformaldehyde
- Trimethylolpropane
- Neopentyl Glycol
- Trimethylolethane

Current Situation

Industry Forecast

- Supply
- Demand
- Trade

Strategic Issues

- Supply
- Demand
- Environmental

Production Process Overview

Introduction

Silver Catalyst Processes

Metal Oxide Processes

Phenolic Formaldehyde Resins Manufacture

Resols

Novolacs

Amino Resins

World Trade

Introduction

Trade Grids

- Formaldehyde
- Melamine formaldehyde resin
- Phenol-formaldehyde resins
- Urea formaldehyde resin
