Risk Bureau

Powerful Risk Modeling

- Full revaluation (including OTC derivatives, structured & securitized products)
- Flexible aggregation and drill down
- Customizable risk engines (Monte Carlo & historical)
- Stress testing (historical, hypothetical, reverse)
- Regulatory reports (UCTIS, AIFMD, SEC 18F-4)

Risk Analysis for Investment Management

Leverage powerful analytics to calculate market risk using Value-at-Risk (VaR) based on Monte Carlo or Historical Simulations as well as position and portfolio sensitivities, scenarios and stress tests.

Decision Support Tools

Decision support tools like Scenario Stress Testing, Back Testing and 'What-if' Scenarios give you an edge in portfolio construction. Run stresses based on historical data, predictive models as well as user-defined scenarios to enhance your risk management infrastructure.

Leverage data for insights

Gain unique insights by using IHS Markit's extensive curated market and reference data. Combine this data with your own internal or third-party data to enhance risk capabilities.

Comply with the latest regulations

Calculate mandatory risk measures such as VaR and stress tests per SEC 18F-4, UCITS, CPO-PQR, FORM-PF and AIFMD rules.

Reduce Total Cost of Ownership

Pay only for what you use with our cloud-enabled technology. Lower the administrative burden of deploying and maintaining a risk solution without sacrificing flexibility.

Benefit from trusted Expertise

Free up your internal resources so you can focus on your business priorities. Our customers are supported with professional services available with 24/7 support.
