Debtdomain Secondary Sites

Debtdomain is the global leader in web-based loan syndications systems with over 250 clients.

Debtdomain supports, syndication, secondary and agency deal phases. Use Debtdomain secondary sites for secondary loan trading and portfolio sales. Key functions include secure document distribution, confidentiality agreements, public/private compliance and activity auditing.

Seamlessly create Secondary Sites from Syndication or Agency Sites. Simple pricing structure: you don't need to worry about per site charges or the number of investors or contacts linked.

Secondary sites

– Choose from two specialized secondary site types: Trading or Portfolio sale

– Control access to each secondary site by selecting contacts from your database or our database of 500,000+ contacts

– Arrange folders and documents on your desktop, upload in bulk to quickly and easily set up your folders and documents

– Import folders and documents from any other Debtdomain site that you can access in any capacity

– Edit your folders and documents using drag and drop functionality

– Set permission to view folders or documents for investors with additional security through watermarking, print and download restrictions

– Fast and convenient download available through bulk download

– Permission any third party to upload documents easily for you to receive

– Accessible from any web browser with no plugins or software required.

Specialised functionality

– Benefit from full compliance functionality. Select LSTA, LMA or APLMA secondary or upload your custom confidentiality agreements and set public/private user declarations

– Upload signed investor confidentiality agreements as part of investor documentation

– Create secondary sites by cloning syndication sites, saving time and duplication of effort

– Fully integrated with Debtdomain Investor CRM - one centralised database for all loan investor contact details across teams and deal stages

– Record investor feedback or status

– Save time by allowing investors to add colleagues

– Add investors with automatic deal site expiry after say 60 days to reduce operational risk

– Full site activity audit reports

Security and reliability

– Debtdomain has been building and deploying web-based systems for loan syndication since 2002

– Data in transit is encrypted using TLS with RSA 2048 (encapsulating underlying High-Grade AE256bit encrypted session keys)

– Data within the database is encrypted using AES-128

– The application is subjected to yearly independent penetration tests, conducted by industry leading practitioners

– All web traffic is protected by AWS Shield Advanced and routed through AWS WAF
