

As new regulations go into effect,

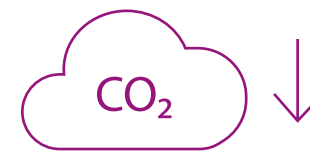

60%-86% of automakers are expected to miss compliance targets* in 2020 – resulting in huge fines

* 60% in EU, 72% in China, 86% in US

Complex and costly challenges

Innovative insights to achieve compliance – single automaker example

By applying super-credits, one OEM was able to reduce its fleet average CO₂ by **7%** for 2020.

The super-credit application saved **€80 million** in possible fines for the same year.

Regulatory allowance narrowed the CO₂ gap to a compliance leader by **11 g/km**, and established a **6 g/km** CO₂ lead over its next-closest competitor

The Automotive Compliance Suite from IHS Markit helps automakers assess pathways and associated costs to achieve compliance.
