

## Are you prepared for the growth in global truck segments?

In 2017, China's medium & heavy truck sales rose 40% y/y and hit the historical highest level, and sales of artics (tractors) alone surged more than

**50%**

Installations of natural-gas engines in heavy trucks remained above 20,000 units and are predicted to further expand to 2020.

From 2018-30, production of medium & heavy trucks (>6t) outside China is expected to rise more than **14%**

In 2017, the combined share of natural-gas and electric trucks in North American Class 4-8 production reached

**2%**

The trucking industry accounted for approximately

**one-fifth**

of global oil demand in 2017.

In 2030, global medium-duty (6-15t) truck sales will approach the

**1 million**

mark for the first time.

By 2025, about **95%** of the world's medium- & heavy-truck sales volume is expected to meet the equivalent of Euro V or higher emissions standards, up from below 50% in 2015.

IHS Markit provides sales, model production and engine production forecasts for the world's medium and heavy commercial vehicles.
