

Opening tabs in separate windows means that you view multiple main tabs simultaneously for side by side comparison and review

Kingdom Flex Gridding now available as a surface style

## Improved Cross Section capabilities

### Quick Start Interface

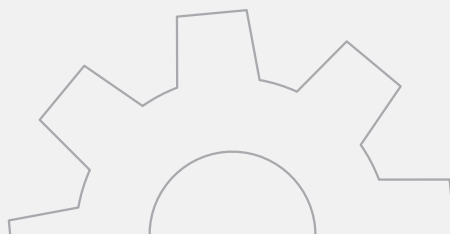

- Well Pane** – Lists all wells in the cross section
- Available Tops Pane** – Lists all tops or a filtered list of tops available for the cross section
- Digital Log Pane** – Lists all digital logs in the cross section
- Raster Log Pane** – Lists all raster logs in the cross section

### Dual Cross Section Display

**Two cross sections** can now be evaluated simultaneously

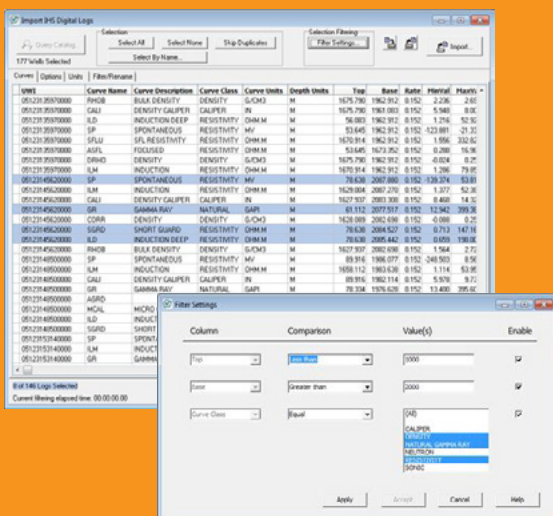

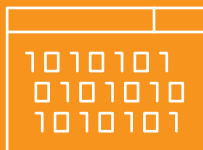

### New Tops Selection Dialog

- Well Indicator Bar** – Visual indicator of which well(s) contain the highlighted top
- Available Tops Pane** – Lists all tops or a filtered list of tops available for the cross section
- Filter by Well Pane** – Lists all wells in the cross section
- Displayed Tops Pane** – Lists tops selected for the display on the cross section
- Option Tabs Pane** – Provides general, miscellaneous and fill options for the cross section and sort controls for displayed tops

## Direct Connect to digital logs and well data

- Additional filter options as well as save/load templates were added to better manage imported log data
- Additional well data types have been added

## Petra is part of a solid IHS Markit geoscience vision

- Sidekick data management
- Usability improvements
- Workflow automation for regional computations
- Raster log handling
- Common components with other IHS Markit analytical tools
